I honed my web development skills, by building web apps for the school. My tasks where:

Brainstorming with team members to come up with new ideas

Gathering technical and functional requirements

Working with Technical Leads to determine application architecture

Participating in MVP and product demos

Presenting ideas for system improvements

Participating in morning standup meetings

Peer-testing code with fellow team members

Creating wireframes and mockups

Utilizing automated and manual methods to test code

Using programming languages to build platforms

Documenting processes and code changes

Actively contributing to all phases of the SDLC

PRECISE FINANCIAL SYSTEMS

Engineer Intern / Jul 2018 - Sep 2018

I worked here to shape my experience in real life development. It is a company that builds banking software, such as shaping operating systems for ATM's. So i was able to contribute to actual marketable software. No joke, working there helped my confidence. My tasks where:

Shadowing senior team members to get a feel for their day-to-day responsibilities

Taking on small software development projects followed by presenting my work to the managing team

Assisting with process improvements, making suggestions on workflow changes where needed

Brainstorming with team members to come up with new Financial Technologies' concepts

Participating in MVP and product demos

Utilizing automated and manual methods to test our code

Facilitating releases of software upgrades

Testing of software to detect and correct errors, improve performance, and upgrade IX.

Prepared reports on specifications and activities for each client and project.
